

# STOP UNNECESSARY OVER-VACCINATION IN SUMMIT COUNTY

Is your pet senior, medically fragile, or battling a **chronic illness**? For many animals, a mandatory rabies booster can be a major health risk.

**There is a better way.** Science proves that a simple blood test (a Titer) can verify if your pet is already protected. We are petitioning the **Summit County Board of Health** to recognize the **0.5 IU/mL Titer standard**—the same one used by the CDC and for international travel.

We need your  
voice to change  
neighbors in  
Summit County.

**SCAN TO  
SIGN THE  
PETITION**

Takes less than  
60 seconds!
